### 19. Programme structures and requirements, levels, modules, credits and awards

The BSc Comparative Pathology degree is a one-year programme, in which each student completes two compulsory taught modules:

Principles of Pathology

Applications of Pathology

And a dedicated Comparative Pathology Research Project

The Project runs throughout the Spring and Summer terms and the students must produce a research report of their project and an oral presentation of their findings.

For the purpose of Credit Transfer, the programme is valued at 120 Credits at Level 3.
