- To provide opportunity to develop research skills, including synthesis of information, critical analysis and an appreciation of factors that contribute to uncertainties

MSci Bioveterinary Sciences

The specific aims of the MSci Year are to enable students to:

- Gain research experience within bioveterinary sciences that is relevant to their degree.
- Gain a deep and systematic understanding of current questions, problems and methods employed within the selected specialised research topic.
- Implement principles of project and experimental design and carefully execute, record and clearly disseminate research.
- Use self-reflection to improve levels of knowledge, professionalism, personal skills and research skills.
- Develop a sound appreciation of the research environment in which the student is working and their role within it.

**24. Overall Programme Level Learning Outcomes - the programme offers opportunities for students to achieve and demonstrate the following learning outcomes. Learning outcomes should be specified for all intermediate awards as well as for the terminal award.**

**On successful completion of the Bachelor of Science course, students will:**

**Modules in which each learning outcome will be developed and assessed:**

<ul style="list-style-type: none"><li>• Act with integrity, be honest, fair and compassionate in all their work.</li><li>• Maintain high ethical principles in relation to professional dealings, the use of information and experimentation in humans and animals.</li></ul>	Projects
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------

- Have an appreciation of health and safety appropriate to laboratory and field work, including completion and understanding of risk assessment and COSHH documents,

<ul style="list-style-type: none"> <li>Demonstrate excellent professional conduct.</li> </ul>	Project
<ul style="list-style-type: none"> <li>Identify specific areas for personal and skill development.</li> </ul>	Research Skills module
